SUMMARY

B.Tech Computer Science Engineering student (CGPA 8.8/10) who builds and ships full-stack web applications using React, Next.js, TypeScript, and Node.js. Designed, developed, and deployed three production applications to Vercel and Render. Seeking a software development internship where I can contribute to full-stack product development.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, Java, C++, C, SQL
- **Frontend:** React.js, Next.js (App Router), HTML5, CSS3, Tailwind CSS, Responsive Web Design, Motion/Framer Motion
- **Backend:** Node.js, Express.js, REST API Design, Server-Side Rendering, Third-Party API Integration
- **Databases:** MongoDB, MySQL
- **Tools & Deployment:** Git, GitHub, Vercel, Render, React Hook Form, Zod, Pandas, NumPy
- **Coursework:** Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Artificial Intelligence & Machine Learning Fundamentals

PROJECTS

README File Generator | Next.js, TypeScript, React, Zod, Grok AI API | Deployed on Vercel

- Built and deployed a full-stack Next.js web application that generates polished GitHub profile READMEs from structured user input.
- Integrated the Grok AI API for automated content generation and engineered an offline fallback generator, keeping the tool fully functional during API downtime.
- Implemented type-safe form handling and schema validation with React Hook Form and Zod across a searchable picker covering 300+ technologies.
- Automated tech-stack badge generation through the Shields.io API, reducing manual README formatting to a single click.

AI Chatbot | React, Node.js, Express, MongoDB, Google Gemini API | Deployed on Render

- Developed a full-stack conversational AI chatbot with a React frontend and a Node.js/Express REST API backend.
- Integrated the Google Gemini API for response generation and persisted conversation history in MongoDB to maintain context across sessions.
- Implemented request validation and error handling across the client-server boundary so third-party API failures degrade gracefully instead of crashing the session.
- Deployed to Render using environment-based configuration for API keys and database credentials.

Developer Portfolio Application | Next.js 16, React 19, TypeScript, Motion, Resend API | Deployed on Vercel

- Built a responsive, mobile-first portfolio application on the Next.js 16 App Router with React 19 and TypeScript, optimizing rendering and asset loading for fast page loads.
- Engineered interactive UI features including cursor-tracking parallax backgrounds, gradient animations, and smooth motion transitions.
- Integrated the Resend API through Next.js API routes to deliver contact-form email with server-side validation.
- Architected a library of reusable, typed React components to keep styling and layout consistent across every section.

EDUCATION

Guru Gobind Singh Indraprastha University, Delhi, India
B.Tech, Computer Science Engineering | 2024 - 2028 | CGPA: 8.8/10

National Victor Public School, Delhi, India
CBSE Class XII (Physics, Chemistry, Mathematics), 2024 - 91% | CBSE Class X, 2022 - 90%
